Welcome to Fast Lane

Fast Lane is proud to present the new Cisco Channel Partner Program brochure. This fully updated guide covers the latest partner program developments and details, and skill and certification requirements for each Partner Specialization.

For years the skill deficit has been a cause of great concern for many companies within the IT industry. However, through an innovative and comprehensive approach to training, Fast Lane are now delivering a constant stream of talent to ensure the ever expanding demand for Cisco certified engineers is sufficiently catered for.

It has been one of the reasons Fast Lane has been awarded Cisco European Learning Partner of the Year 2009. Thierry Drillhon, Vice President Worldwide Channels European Markets, Cisco: *“By collaborating with Cisco country teams, Fast Lane have developed measurable talent programs designed to address the IT talent gap.”* One of these is the Partner Talent Program Fast Lane started in 2007 in cooperation with Cisco and Randstad IT Services. The program has created more than 40 certified professionals in CCNP, CCVP and CCSP. The Centrum Arbeidsmarktvraagstukken ICT (CA-ICT) has awarded this program with the Employability Impulse.

We thank you for your continued co-operation and look forward to working with you in the future.

Herman Goedman
Managing Director, Fast Lane Benelux

Partner Certification Service: What Fast Lane can do for you

Partner status offers a wide range of benefits to companies seeking to differentiate themselves from competitors. However, before such status can be achieved, they must first comply with a strict set of criteria. The higher the partner level, the more stringent these requirements become.

What May Happen

Often the criteria will change with little prior notification, and partners will need to make the necessary arrangements in a very short period of time. In such situations companies may find themselves struggling to organize the associated training in the time available. The course in question may not be scheduled to run publicly, resulting in the incursion of enormous costs for a class that has to be held privately or attended abroad. Furthermore, the employees in question may need to suddenly be pulled out of work, causing additional problems for the organization.

Fast Lane understand the benefits and brand differentials a company can derive from participating in Channel Partner certification but, above all, we appreciate the complexities and risks involved in the program. After years of designing training programs around Cisco certification, we have developed a high level of understanding for this complex and ever changing process. We use this vast experience to ensure our customers have effective training programs, meet their certification deadlines and reap the full rewards of Cisco Channel Partner status.

What To Do?

The training program you require will be dependent on the certification your company wishes to achieve or maintain. In this brochure, we provide a comprehensive training overview for each role and certification.

Why Choose Fast Lane?

Fast Lane offers a complete partner certification service. We will work with you to establish which status is appropriate for your company and then formulate a plan to ensure this is achieved on schedule and within budget.

When training with Fast Lane you will receive the official authorized Cisco course material and you will also use our professional lab equipment. Fast Lane works with Cisco certified instructors exclusively: instructors with extensive real world experience and excellent didactical skills.

What Are The Benefits?

By working with Fast Lane and capitalizing on our extensive experience in the industry, your company will enjoy a number of benefits. Employees will attend high quality training, ensuring they develop the skills and knowledge required to effectively perform their roles, and your company will be able to maintain its partner status without the business suffering in the short term. Furthermore, any sudden or unexpected developments in the program will be brought immediately to your attention and an effective plan of action will be devised.

Frans Wittenberg, Head of technical operations - Channels, Cisco

"The existence of a well educated and appropriately certified partner channel is of vital importance to Cisco. It is therefore a great reassurance that such a wide range of partners continue to strive for certification. As a Cisco Learning Solutions Partner, Fast Lane fulfils a crucial role in this education process and, consequently, I strongly advise our partner channel to work alongside Fast Lane in order to ensure they can achieve and maintain their Cisco Certification."

Partner Certifications

Select Certification

Overview

Cisco Select Certification recognizes and rewards partners that have achieved the SMB Specialization. The SMB Specialization focuses on small and medium-sized business customers that have fewer than 250 employees. Select Certification reflects a partner's technology and business expertise specific to the SMB market and can help partners build customer satisfaction and loyalty, while increasing their exposure to new customers.

Specialization Requirements

- SMB Specialization

Role Sharing

The Engineer role combines System Engineer and Field Engineer. One individual may fill both Account Manager and Engineer roles.

Certified Role Requirements

Cisco Career Certifications are not required.

Title	Account Manager	Engineer
SMB Specialization	1	1

Premier Certification

Overview

Cisco Premier Certification recognizes and rewards partners that have achieved the Express Foundation Specialization. This foundational specialization expands technical competency in the integration of basic routing and switching, wireless LANs, and security technologies. In addition, Premier Certified Partners have integrated a basic level of Cisco Lifecycle Services into their offerings and have demonstrated a measurably high level of customer satisfaction.

Specialization Requirements

- Express Foundation

Role Sharing

- A single qualified individual may fill the Account Manager role in up to a total of 4 specializations.
- A single qualified individual may fill the System Engineer role in up to a total of 2 specializations.
- A single qualified individual may fill the Field Engineer role in up to a total of 2 specializations.

Individuals may not cross-populate between the Account Manager, System Engineer and Field Engineer roles. SMB, CRM Express and VPN-Firewall specializations are not limited by the above allocation rules.

Certified Role Requirements

Title	Account Manager	System Engineer	Field Engineer
Express Foundation	1	1	1

Silver Certification

Overview

The Cisco Silver Certification designation recognizes partners that have either achieved two of the following four advanced specializations: Unified Communications, Routing and Switching, Security, and Wireless LAN; or have achieved the Express Unified Communications Specialization and one of the following advanced specializations: Routing & Switching, Security, or Wireless LAN. In addition, Silver Certified Partners have integrated Cisco Lifecycle Services into their offerings and demonstrated a measurably high level of customer satisfaction.

While Silver Certification recognizes partners for their broad technical skills, Master Specialization recognizes partners for achieving the deepest level of expertise in a specific Cisco technology. Cisco Silver Certified Partners can further expand their expertise by achieving Master Security Specialization or Master Unified Communications Specialization.

Specialization Requirements

Any two of the following Advanced Specializations:

- Advanced Unified Communications
- Advanced Routing & Switching
- Advanced Security
- Advanced WLAN

or

- Express Unified Communications plus one of:
 - Advanced Routing & Switching
 - Advanced Security
 - Advanced WLAN

Role Sharing

Please refer to the Role Sharing paragraph (Premier Certification) on page 8.

Certified Role Requirements

Title	Account Manager	System Engineer	Field Engineer
Express Unified Communications	1	1	-
Advanced Routing and Switching	1	1	1
Advanced Unified Communications	1	1	1
Advanced Security	1	1	1
Advanced Wireless LAN	1	1	1

CCIE requirements for Certification: Silver = 2.

CCIE can satisfy any technical CCx specialization role.

Gold Certification

Overview

The Cisco Gold Certified Partner designation offers the highest level of branding, economic incentives, and differentiation as a reward for loyalty to Cisco, for capabilities in providing value-added services, and for a commitment to customer success. Cisco Gold Certified Partners have attained the broadest range of expertise across multiple technologies by achieving all of the following four advanced specializations: Unified Communications, Routing and Switching, Security, and Wireless LAN. In addition, Gold Certified Partners have integrated Cisco Lifecycle Services into their offerings and demonstrated a high level of customer satisfaction.

While Gold Certification recognizes partners for the broadest technical skills, Master Specialization recognizes partners for achieving the deepest level of expertise in a specific Cisco technology. Cisco Gold Certified Partners can further expand their expertise by adding a Master Security Specialization or Master Unified Communications Specialization.

Specialization Requirements

- Advanced Unified Communications
- Advanced Routing and Switching
- Advanced Security
- Advanced Wireless LAN

Role Sharing

Please refer to the Role Sharing paragraph (Premier Certification) on page 8.

Certified Role Requirements

Title	Account Manager	System Engineer	Field Engineer
Advanced Routing and Switching	1	1	1
Advanced Unified Communications	1	1	1
Advanced Security	1	1	1
Advanced Wireless LAN	1	1	1

CCIE requirements for Certification: Gold = 4.

CCIE can satisfy any technical CCx specialization role.

	Implementing Cisco Advanced Storage Network Solutions (IASNS)	5	

Master Specializations

The Cisco Master Specialization is targeted at an elite group of partners that have the most in-depth technology skills and have demonstrated success in selling, deploying, and providing services for more sophisticated Cisco solutions. Partners with a highly qualified practice in a given technology can achieve Master Specialization regardless of their certification level. Additionally, Master Specialization provides a higher level of distinction for partners and helps to highlight the expertise they bring to their field.

Cisco currently offers the Master Unified Communications Specialization and Master Security Specialization. To find out more on requirements to achieve these specializations please contact Fast Lane.

Fast Lane Offerings

As an Authorized Cisco training provider, Fast Lane offers the following services:

- ATP Partner training for:
 - Rich Media Communications
 - Wireless Mesh
 - Unified Contact Center Enterprise
 - Cisco Customer Voice Portal
 - Video Surveillance
 - Telepresence
- Other ATP Training:
 - IPTV
 - Digital Media
- Advanced Services Training Partner
- Technology focus around Unified Communications, Wireless, Data Center and Security
- CCIE programs
- Certification and skills development
- Consulting
